

“There’s, what, billions of phones all around the world just sitting in people’s pockets... what if we used all those phones to build a massive network...if we could do it, we could build a completely decentralized version of our internet with no firewalls, no tolls, no government regulation, no spying; information would be totally free in every sense of the word”

– Richard Hendriks

Free software' is a matter of liberty,
not price. To understand the
concept, you should think of 'free' as
in 'free speech,' not as in 'free beer'.
